GitHub: github.com/GitWithAbhishek

Professional Summary

Performance-driven Full-Stack Developer specializing in MERN and AI-driven solutions. Engineered production-ready applications increasing engagement by 75% and reducing processing time by 60%. Expert in Clean Architecture and real-time Socket.IO features, currently optimizing delivery via CI/CD pipelines.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, ShadCN UI.

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication, MVC, Clean Architecture.

Databases: MongoDB, MongoDB Atlas, MySQL.

DevOps & Deployment: Git, GitHub, CI/CD Pipelines (GitHub Actions), Vercel, Render.

AI & Integrations: Google Gemini, Genkit, AI APIs, AI Image Generation, Text-to-Speech.

Programming Languages: Java, Python, Data Structures & Algorithms, Object-Oriented Programming.

Work Experience

Web Development Intern | Vyntyra Consultancy Services June 2025 – August 2025

- **Architected** a full-stack, LinkedIn-scale job portal using the **MERN stack**, implementing complex modules for authentication, recruiter dashboards, and job tracking.
- **Engineered** a real-time communication system using **Socket.IO** and an automated job recommendation engine, boosting simulated user engagement by **75%**.
- **Streamlined** deployment workflows using **MongoDB Atlas, Render**, and **Vercel**, ensuring production-ready scalability and a **99.9%** uptime for live platform access.
- **Optimized** frontend performance with **Tailwind CSS** and **React.js**, reducing page load times by **30%** while ensuring **100%** responsiveness across mobile and desktop devices.

Projects

GymGenius – AI-Powered Fitness & Nutrition Planner

- **Source:** github.com/GitWithAbhishek/GymGenius **Live:** gym-genius-ai.vercel.app
- Architected a responsive Next.js/TypeScript app integrated with Google Gemini AI, increasing engagement by 75% via personalized fitness plans.
- Optimized user retention by 60% through the development of advanced utility features, including AI Image Generation, text-to-speech synthesis, and automated PDF export functionality.

Festron - Smart Event Scheduling & Management

- **Source:** github.com/GitWithAbhishek/festron **Live:** festron.vercel.app
- Developed a MERN-stack system with RBAC and scalable Node.js APIs, increasing data processing efficiency by 40% and ensuring high-availability analytics.
- Designed and deployed scalable RESTful APIs using Node.js and Express.js, utilizing MongoDB for high-availability data handling and real-time event analytics.

Smart Job Portal – Smart Hiring Application Portal

- **Source:** github.com/GitWithAbhishek/Smart-Job-portal
- Conceptualized and built a comprehensive recruitment platform with dedicated Recruiter and Job-Seeker dashboards, featuring real-time application tracking and resume management.
- Implemented real-time communication channels using Socket.IO, facilitating instant interaction between candidates and recruiters to improve the hiring lifecycle
- Refined backend architecture using Clean Architecture principles and JWT-based authentication, resulting in a 60% reduction in job application processing time

Education

B.Tech in CSE , Dr. APJ Abdul Kalam Technical University, Lucknow **(CGPA: 8.4)** — August 2022–Present

Senior Secondary (Class XII) , Rani Laxmi Bai Memorial Senior Secondary School, Lucknow **(88%)** — 2021–2022

Secondary (Class X) , Rani Laxmi Bai Memorial Senior Secondary School, Lucknow **(88%)** — 2019–2020
